

Qualified maintenance of SHEV systems reduces the risk of personal and material damages

SHEV systems

- smoke and heat exhaust systems are safety systems
- maintenance of the SHEV system in accordance with DIN 18232, at regular intervals in accordance with the manufacturer's specifications, at least once each year
- legislators also stipulate the maintenance of smoke and heat exhaust systems to protect human lives and material values, such as in MBO, LBO, DIN 18232, VdS CEA 4020

Maintenance by VELUX Commercial

1.4.1
